

SMART™ BRIDLES

The SMART™ Bridle-Halter

FEATURES

Beta Blue 522/White 520

Browband: Adjustable.

Throatlatch:
Lies where it should:
behind the cheek.

Noseband:
Unless you really
need/want to crosstie
your horse, we really do
not recommend this style.
The side halter squares
can rub the cheeks bones
- especially on short-
headed horses - and can
interfere with the proper
action of a hackamore.

Green 103/Green 521

Chinstrap area:
Completely adjustable
under the chin and to the
throatlatch to fit almost
any horse. Halter ring lies
flat and stays stationary.
Easily replaced if broken.

Convertible:
Make into an "endurance
bridle" by removing the
browband.
Make into a headstall by
removing the noseband,
bit-hangers and chin
connectors. Your bit or
hackamore will easily
connect to the side cheek
straps. Make into a
"Quick Bridle" by adding
an extra completely
adjustable crown. (See
Quick Bridles)

Beta Black 520/Green 528

Beta Orange 520/Blue 522
